FLAVOUR PROFILE

ELABORATION

We keep the grapes 24h in cold stores at 4°C to reduce the oxidation.
 Immediately, its macerated with its skin at a very low temperature for nearly twenty four hours. Followed by a fermentation in French oak barrels at 14-16°C for almost a month.
 We preserve it with its finest lees for 10 months with weekly battonages in order to adquire more structure and volume.

AROMA

PAIRING

With a good and refreshing acidity, this wine suggest special combinations such as intense cheese, seafood and rice.
